## Skills

Three years experience analyzing email data. Trained in Python, SQL, and Tableau. I'm a detail-orientated, enthusiastic data-analyst that aims to drive business goals with data! I'm fluent in English, French and Mandarin and have a bachelor of engineering degree.

**Hard skills:** data analysis, statistical analysis, data collection, data management, data visualization, and data mining.

**Soft skills:** collaborative, committed, keen to learn, strong problem-solving skills (AI-assisted, independently and in a team), style-and-meaning conscious presentation skills, analytical and reliable.
